Displays

HP Pavilion-Compatible Displays

M-Series Displays

The best way to see the power of your HP Pavilion PC is with a high-resolution Hewlett-Packard display. HP M-Series displays feature an integrated combination of advanced technology and ergonomic thoughtfulness, just like the HP Pavilion PC. The ultimate result is a display solution that is the ideal complement to the HP Pavilion PC, one that is feature-rich, easy to use and built to optimize today's high-performance graphics and video technology.

The best view of the HP Pavilion PC

Multi-function, high-resolution HP displays

Here's what you can expect when you pair HP displays with the HP Pavilion PC.

- **Flawless display/PC compatibility** is the result of technical consideration at the design level. This integrated approach means that HP displays will work perfectly with HP Pavilion PCs. They look and feel like they go together, and this joint development enables the integration of speakers, microphones and other complementary features.
- **Application-specific, user-definable display modes** that allow users to fine-tune key display settings based on what the computer is being used for. HP M-Series displays feature four pre-programmed display settings:
  - **The "Picture" setting:** Is used to optimize the appearance of pictures and graphics, mirroring the display settings used by graphics pros and in photo applications.
  - **The "Games" setting:** Delivers the high contrast and color settings that enrich computer gaming and video.
  - **The "Productivity" setting:** Is best for home office environments that are running workhorse applications, such as spreadsheets and word processing.
  - **The "Personal" setting:** Allows you to select and save your own individual color, contrast and brightness levels.
- **One-touch tuning** is achieved through key controls that are conveniently located on the front of the display. No blind reaches around the display, because power, brightness, contrast and other controls are placed front-and-center, within easy reach.
